

A true internet success story, Nexopia was born in the dark of a cold Edmonton winter only to rise to become Canada's largest social networking site for youth. With over 1.2 million members, and hundreds of new accounts created every day, Nexopia is quickly solidifying its reputation as the online place for teens to connect and express themselves.

## Position: Frontend / Application Developer

Nexopia is hunting for a trained frontend developer who can contribute to our fast paced and dynamic work environment. We're looking for candidates who will excel at working both independently and within a team. Other must haves include: well developed personal project management skills, keen multitasking abilities, and a proven working understanding of complex programming.

---
