

A true internet success story, Nexopia grew from a small online community of teens in Edmonton Alberta to become Canada's largest social networking site for youth. Now, with over 1.4 million members and hundreds of new accounts created every day, Nexopia is quickly solidifying its reputation as the place for teens to connect and express themselves.

Position: Systems Developer

Nexopia is looking for an experienced System's Developer who excels at working both independently and within a fast paced team dynamic. Other must haves include: well developed project management skills, keen multitasking abilities and a proven working understanding of complex systems.

RESPONSIBILITIES:

- Linux application development
- Linux client/server application development
- Working with or on Lighttpd, PHP, Ruby
- Developing applications in line with performance constraints (execution time, memory usage, etc).
- C/C++ and/or Java Language

QUALIFICATIONS:

- Bachelors degree in technical area (BSc/BEng) or equivalent experience
- 5 years experience
- Pluses:
 1. Linux kernel development
 2. Programming language design/development (eg. Contributions to Ruby/Rubinius/Python/PHP/GCC projects)
 3. Worked on an application used by hundreds of thousands of people

SALARY AND BENEFITS:

Nexopia.com Inc takes care of its staff. A competitive salary, equity, medical benefits, and 3 weeks paid vacation are just the beginning of the perks you can expect from us.

Salary figure will be decided based on experience and qualifications.

The successful candidate must pass an Employment Police Information Check as a condition of their employment with Nexopia.com Inc

To join our team, submit a resume and cover letter citing the career posting to: careers@nexopia.com
